

Bangladesh University of Business and Technology (BUBT)

Department of Computer Science and Engineering

Assignment 01: Fall 2024

Course Code: CSE 111 | Course Title: Object Oriented Programming

Intake: 53rd, Program: B.Sc. Engg. in CSE

Deadline: 19/09/2024

Marks – 10

1. Think and write about the way that classification and polymorphism play an important role in our day-to-day lives. 5

2. To illustrate exactly when an object is constructed and destructed when returned from a function, create a class called '**who**'. Have **who**'s constructor take one character argument that will be used to identify an object. Have the constructor display a message similar to this when constructing an object: 5

Constructing who #x

where **x** is the identifying character associated with each object. When an object is destroyed, have a message similar to this displayed:

Destroying who #x

where, again, **x** is the identifying character. Finally, create a function called **make_who()** that returns a **who** object. Give each object a unique name. Note the output displayed by the program.
