Md. Mahfuzul Bashar Shaikot – 20245103038

Md. Sakibur Rahman – 20245103091

Abu Ahmad Mahfuzor Rahman – 20245103092

Project Overview

DealerSync is a mobile-first inventory and order management platform designed for dealers.

It provides a centralized system to:

- Manage product inventory
- Track stock levels
- Create store orders
- Generate low-stock alerts
- Monitor sales performance
- Generate business reports

Objectives

- **Provide real-time inventory tracking.**
- **Automate store order creation.**
- **Calculate subtotal and VAT automatically.**
- **Notify users when stock is low.**
- **Generate sales and profit reports.**
- **Reduce manual work and human error.**

Users

- Dealer

Problem Specification

Current Problems

- Paper-based ledger books
- Disconnected spreadsheets
- Manual stock calculations
- Manual order processing

Consequences

- Stock inaccuracies
- Data loss
- Delayed order processing
- Unfulfilled orders
- Difficulty tracking sales and profit

Solution

DealerSync provides a centralized digital solution.

Development Flow

Requirement Analysis

System Design

Inventory Module

Order Module

Reports & Alerts

Testing & Integration

Existing System Analysis

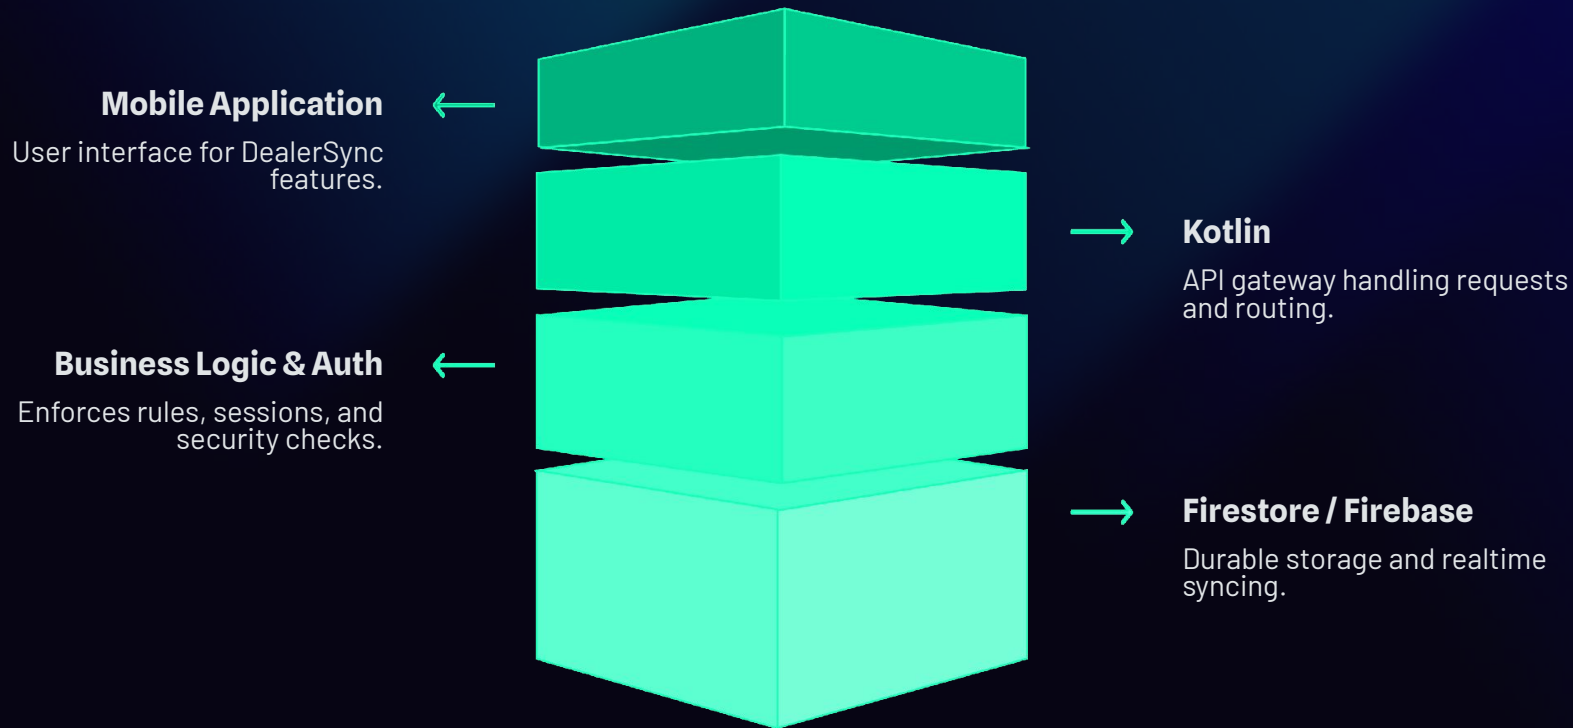

Existing System

- Paper-based records
- Manual calculations
- No real-time stock visibility
- Difficult to track sales
- Higher chance of human error

DealerSync

- Digital inventory management
- Automated calculations
- Real-time stock visibility
- Automated reports
- Low-stock alerts
- Mobile-first interface

System Architecture

Implementation

Front-End

- Kotlin
- Mobile-first UI
- Figma for UI/UX design

Back-End

- Firebase

Database

- Firestore

Development Tools

- Git & GitHub
- Android Studio
- Figma

Methodology

- Agile Scrum

Main Modules & Features

Authentication

- Dealer login

Dashboard

- Total products
- Active stores
- Today's orders
- Revenue
- Low-stock alerts

Inventory Management

- Add products
- Update products
- Delete products
- Search products
- Track stock

Main Modules & Features

Order Processing

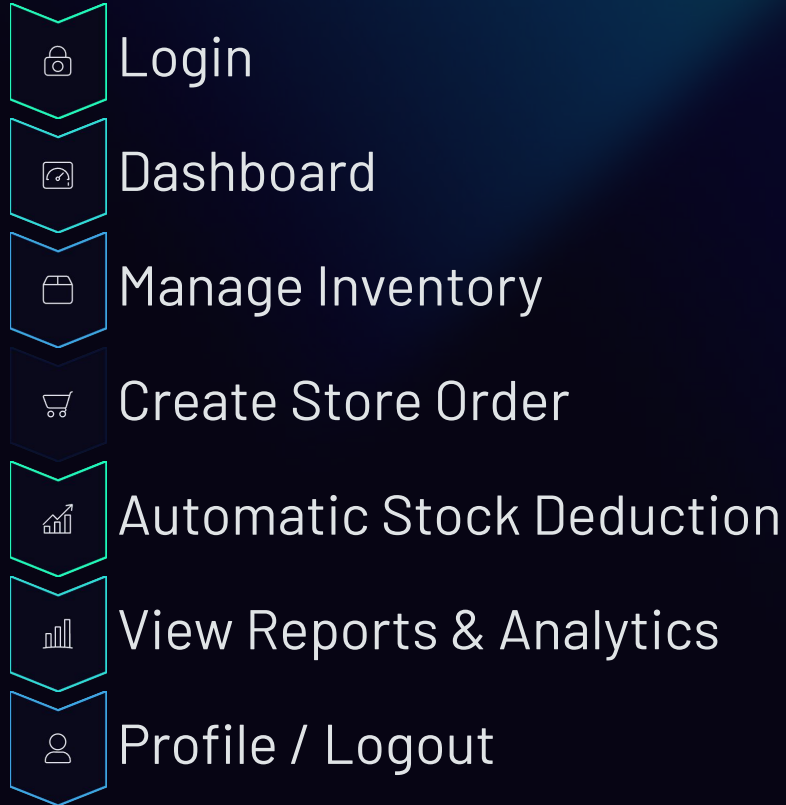

- Create store orders
- Multiple payment methods
- Automatic subtotal
- 5% VAT calculation
- Order status tracking

Reports & Analytics

- Total sales
- Net profit
- Sales overview
- Top-selling products

User Flow

Conclusion

Conclusion

DealerSync provides a centralized, mobile-first solution for inventory and order management.

It helps:

- Reduce manual work
- Improve stock visibility
- Automate order calculations
- Reduce data errors
- Monitor business performance

Future Works

- Offline mode
- Bluetooth receipt printing
- AI-based sales forecasting
- Automatic stock prediction

THANK YOU!

DealerSync Inventory Management System
